Subject: Answer to question about BDCP and climate change

A couple of you asked about the reference in the questions for Bay Delta workshops 1 and 2 to:

"What changes to the Bay-Delta Plan should the State Water Board consider based on the above information to address existing circumstances and changing circumstances such as climate change and BDCP?"

You were not quite sure what the reference to BDCP means in practice and were wondering if the Board staff has something specific in mind and how BDCP factors might differ between the two workshops.

Response: We will be considering changes to the Bay-Delta plan under existing condition and may also consider changes under the BDCP. Participants should present information that they think informs those changes (e.g. should we have phasing to account for BDCP, does the adaptive management need to reflect issues related to BDCP etc.). We can discuss in more detail if needed.

Hope that helps.
